

COMPANY PROFILE

Computers 4 Kids is a *Technology Top 100* winning educational ICT company that was formed in 1995 by Russell Pengelly, a qualified Special Needs Educator. Computers 4 Kids provides a unique integrated ICT curriculum, teacher training and ongoing support to primary and high schools in South Africa as well as 24 countries across the globe.

Based in Cape Town, Computers 4 Kids, currently services well over 500 schools in Southern Africa on a monthly contractual basis. The company has successfully trained in excess of 18 000 teachers and over 6 000 000 learners in South Africa over the years and has recently been the successful bidder for a number of tenders ranging from e-Learning Training to customizing digital content. Our integrated National Curriculum CAPS aligned ICT curriculum ties in with the classroom themes and topics that are being taught by the class teacher, which means that the learners can consolidate academic themes, skills and topics covered in the class whilst mastering ICT skills. Teacher training and development as well as the integration of ICT's are the companies strengths.

Curricula materials have been localised for the various countries in which we operate (South Africa, Angola, Tanzania, Namibia, Swaziland, Botswana, Ghana, Mexico, Australia, Malaysia etc) as well as translated into French, Portuguese and Spanish.

Resource disks, templates, website links and educational games form a core element to the curriculum which goes hand in hand with our unique teaching approach – this culminates in effective teaching and learning in the classroom. The curriculum is not operating system dependent which makes it quite unique. This fun and relevant integrated ICT curriculum is made up of over 250 step-by-step full colour modules and has been approved by various education departments in South Africa. All educator resources are provided on 10" tablets and updated regularly through our Computers 4 Kids app.

Full initial teacher training and on-going support on a monthly basis by means of our network of support staff ensures the curriculum works for each school. All modules can be assessed automatically and cover all learning areas as detailed in the National Curriculum Statement.

Computers 4 Kids won the prestigious *Technology Top 100* Award for Excellence in the Management of People and the Director General's Award for Emerging and Small Businesses in 2012.

For learners and educators wanting internationally endorsed certification, our **e-Learner** integrated ICT curriculum allows for certification from the **ECDL Foundation** in Ireland. Computers 4 Kids is proud to be the only company worldwide offering an ECDL endorsed product for primary school learners.
