

# Minecraft: Education Edition Curriculum Instructions

Congratulations on choosing to use our Minecraft: Education Edition software, powered by Computers 4 Kids.

When you access the *classonline* website and click on the *Minecraft: Education Edition* link, the following page will open. This is the main interface.

**Now I want to complete a lesson with my class. What do I do next?**

The Volumes represent the Grades in your school. We have grouped the lessons into Volumes so that you can offer remedial help to learners by going down a Volume as well as extension to learners by going up a Volume.

To start a lesson, follow these steps:

**STEP 1** - Select your relevant grade.

**STEP 2** - Select the lesson you want to complete by clicking on it

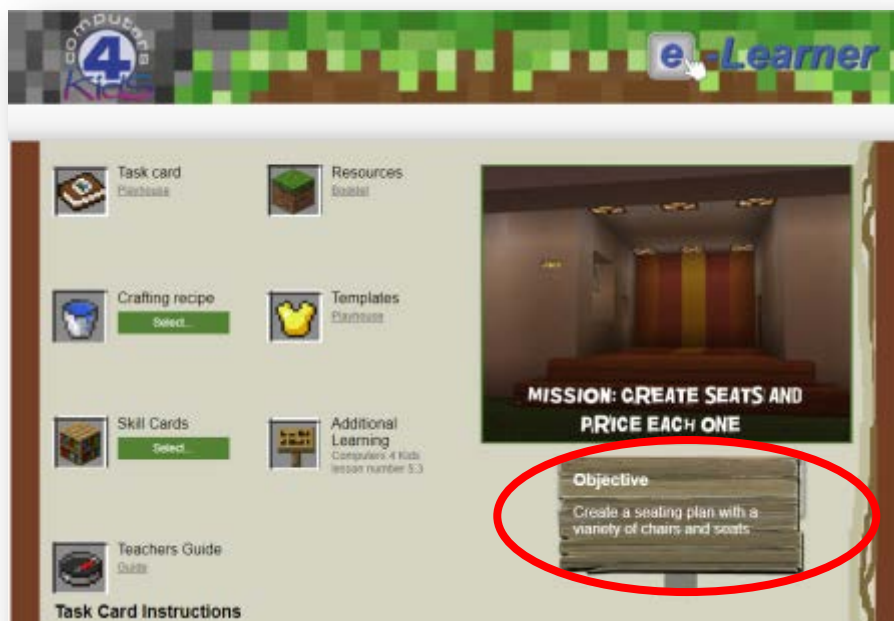

As we follow an integrated approach to teaching ICT, you will try and complete lessons and themes that the class teachers have been teaching in their classrooms. This means that you might start with lesson 1. 3 and then do lesson 1.8 the next week – you do not start at 1.1 etc.

The screenshot shows an e-Learner interface for Volume 5. At the top left, there is a logo for 'computers 4 Kids' and at the top right, the 'e-Learner' logo. Below this is a white banner with 'VOLUME 5' in brown text. The main area is a grid of eight lesson cards, each with a circular thumbnail image and a text box containing the lesson title, description, and a 'Try it now' button.

Lesson Title	Description
5.1 Medieval Coat of Arms	Create a coat of arms using blocks. *Try it now*
5.2 Seats for Sale	Design a seating plan.
5.3 Building Budget	Build a house using a budget.
5.4 Dam Builders	Learners build their own dam.
5.5 Celebrations	Create a town festival.
5.6 Globe Trotters	Build a famous world structure.
5.7 Archery Add	Learners have an archery competition and add results to determine the winner.
5.8 Crossing Borders	Learners negotiate the split of the world's border.

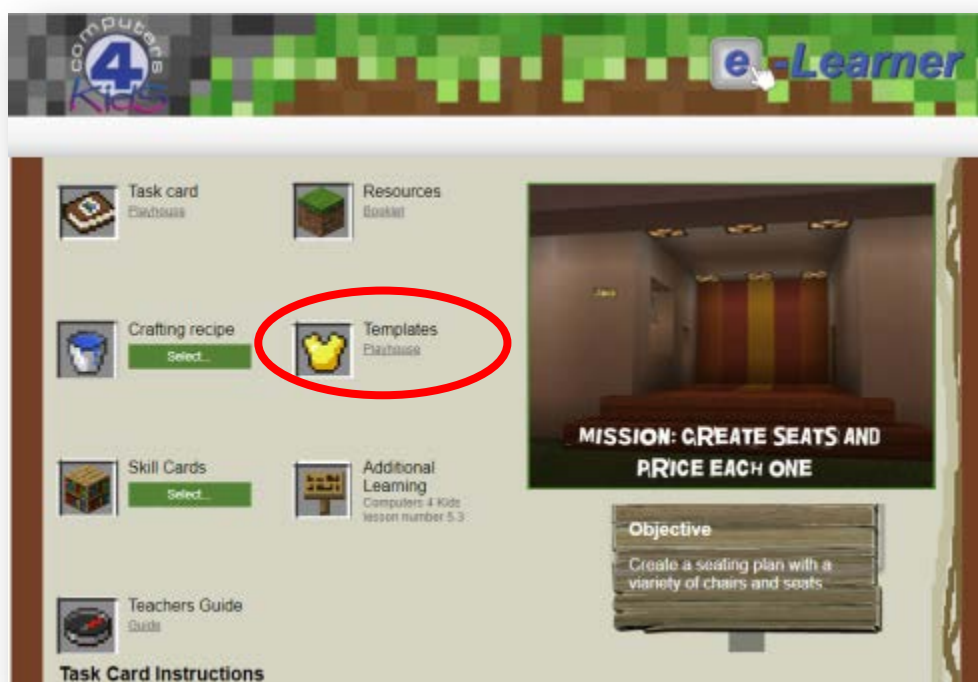

### **STEP 3 – Objective**

This signboard shows the objective/outcome to the lesson.

### **STEP 4 – Template Link**

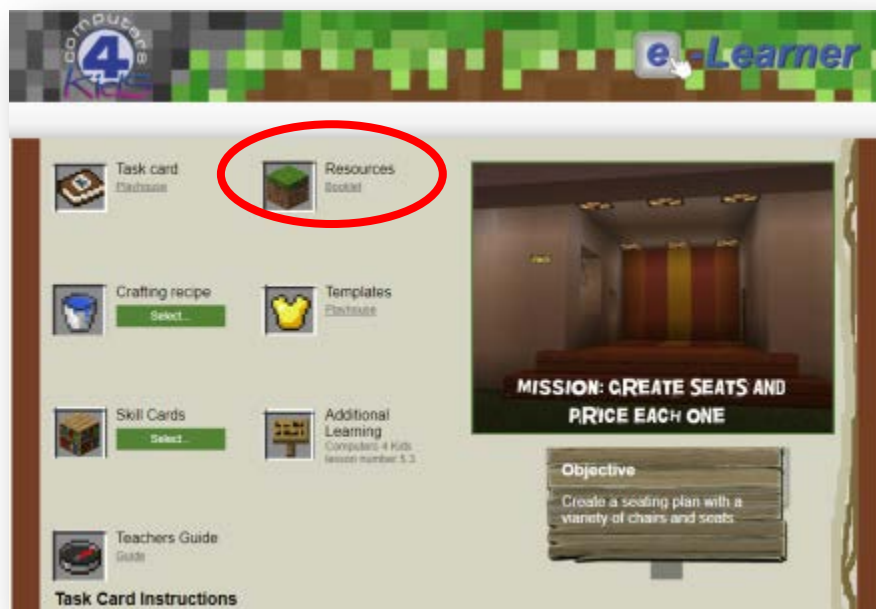

Most of our Minecraft lessons will have an already made-up “world” (template) for the learners to use. If there is no link here it means that the learners are creating the “world” from scratch and you will need to read the step-by-step instructions on how to complete the lesson.

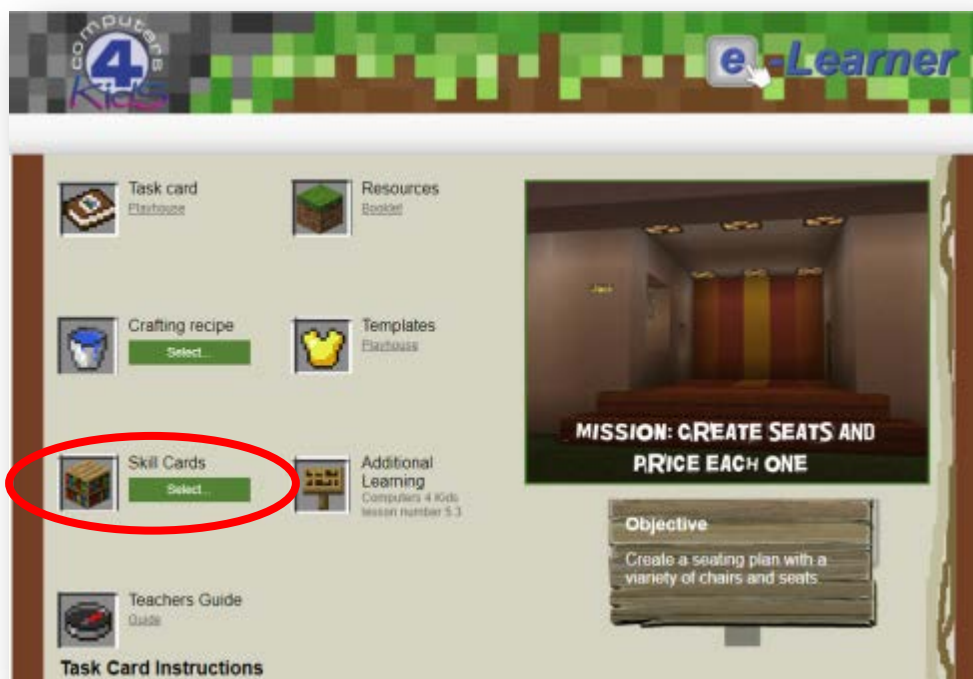

### **STEP 5 – Resource Linx:**

This is the lesson instruction booklet giving you step-by-step instructions on how to complete the lesson.

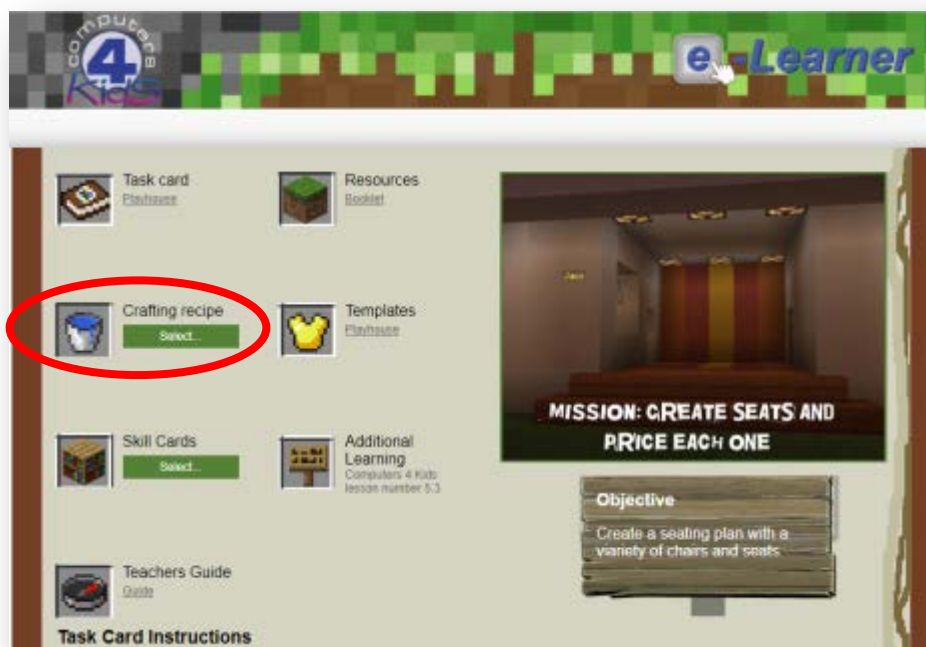

### **STEP 6: Skills Cards**

In the lesson booklets, you will be asked to refer to Skills Cards. Skills Cards explain how to perform certain actions in Minecraft. These are found here:

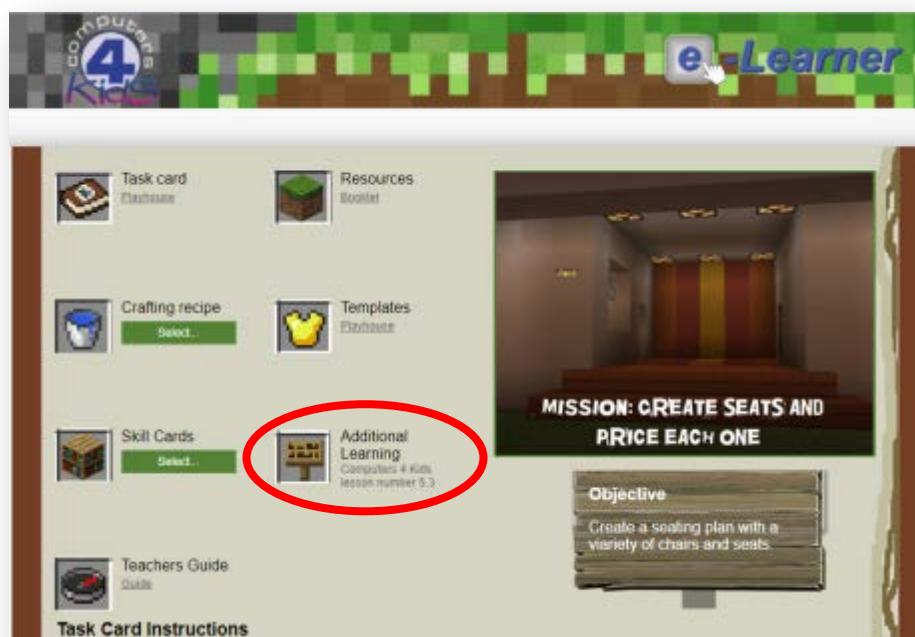

## **STEP 7 – Crafting Recipes**

These Recipe Cards are there to help the learner with crafting items in Minecraft. Crafting is when you make tools out of things you have mined ie: iron.

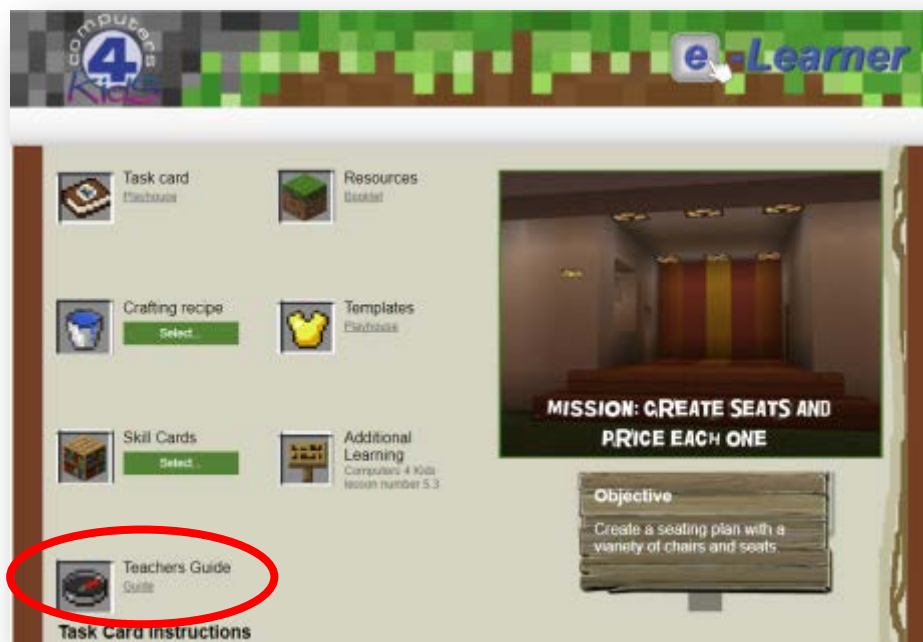

## **STEP 8 – Additional Learning Opportunities**

This allows you to see the lesson link between Minecraft: Education Edition and our Computers 4 Kids Primary School Curriculum.

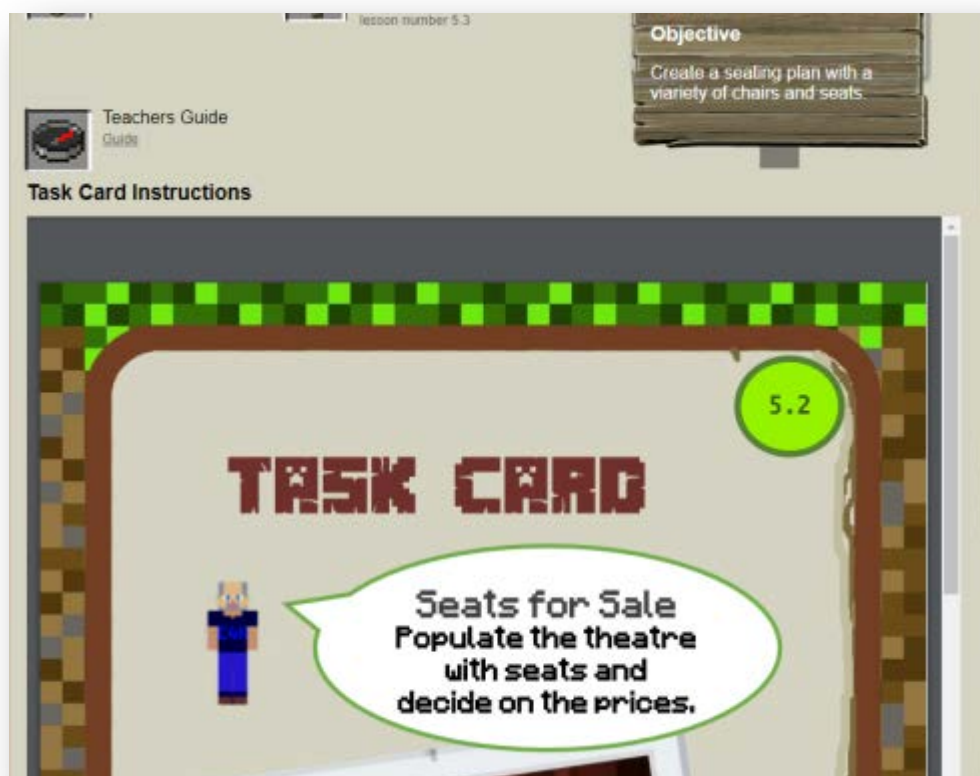

## **STEP 9 – Teacher’s Guide**

This is a comprehensive teacher’s guide to the Computers 4 Kids Minecraft: Education Edition lessons.

## **STEP 10 – Task Card Instructions**

The task card provides simple step-by-step instructions on how to complete the lesson.

## **STEP 11 – Additional Resources**

Looking for more on Minecraft: Education Edition and/or coding in the classroom? Take a look at these two links below for more resources.
