

2017 / 2018 Software Update Disk

e-Learner Curriculum V1.7

Good Day All

Our development team has been hard at work - updating, testing, tweaking and finalising updates to the current e-Learner Curriculum Software for 2017/2018.

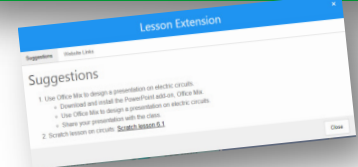

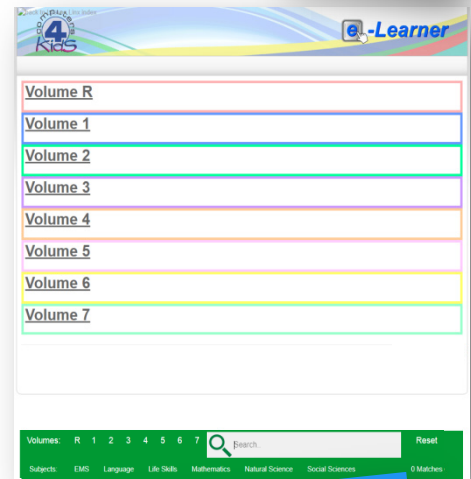

Please read the details below regarding the update disk. This is a new **FULL** install which **does not** require V1.6 to already be installed on your PCs. If you need any assistance, contact Cheryn on support@computers4kids.co.za. When installing your disk you will require an activation code. This can be requested from Cheryn on support@computers4kids.co.za.

The new update disk includes:

- New critical thinking icons to promote critical thinking in the classroom.
- New lesson extensions for Volumes 6 & 7! The lesson extensions provide further learning opportunities using various software and/or technologies that aren't used in the core lesson.
- Animated cartoon lesson introductions. These are short animations to provide information relating to the lesson at hand.
- Digital Badge System to track and reward learners progress.
- Look out for the new icons for whiteboard, collaboration, Emotional Intelligence, HTML 5, Inking and critical thinking lessons.

- Updated look-and-feel for lesson pages.
- New Search Function. (Have a specific keyword? Need to quickly find the lesson using this keyword? Now you can simply type it in the search bar - tada!)
- 21st Century Life Skills have also been included in this Search Function. Be sure to use the terms such as *“Critical Thinking”*, *“Design”* and *“Drawing”*.
- Updated website links page.

- Minecraft: Education Edition curriculum materials for Volumes 4 to 7 ONLINE only. Computers 4 Kids are now registered Microsoft Education Partners. We can now offer Microsoft training and can be contacted for all your Microsoft licensing needs.
- e-Learning for Kids games are now ONLINE only! This means you will require internet access to play these games.
- All software downloads are now ONLINE only. Essential software is found on your Disk. Extra software now requires internet access to download.

Don't forget about the features in place from V1.6!

- New HTML 5 lessons to be found in volumes 2, 3 and 7.
- QR code lesson can be found in Volume 7.
- Practical hands-on Lesson Worksheets to be found on each lesson page for every lesson.
- Microsoft 2016 booklets for each lesson.
- Updated look-and-feel for Educator Resources page.
- New Computers 4 Kids screensavers can be found under the "Classroom Resources".
- Rio 2016 Olympic Lessons can be found under the "Olympics page".

Want to use the Online Curriculum instead of installing this disk?

ADVANTAGES:

- Immediate updates and changes as and when we create them.
- Immediate Minecraft Lesson Updates and Changes
- Live "Fresh from the Dev Desk" Lessons
- Google Innovate Lessons
- Parent Feedback Tool which makes YOU look professional!

For those schools wanting to offer our e-Learner adult course as a means of offering community based ICT classes, we can offer this free of charge to your school. Contact Cheryn on support@computers4kids.co.za in this regard. Lesson content includes exercises covering the creation of CV's what to do at a job interview, comparing banking costs and basic CPR etc – all using the Office suite.

Enjoy!

Best wishes from the Computers 4 Kids Development Team & The Support Desk
